

HORSESHOE CRAB: BIOGRAPHY OF A SURVIVOR

Traveling from the Delaware Bay to the Florida Panhandle, this examination is a quest through the natural history and science behind one of nature's oldest and oddest survivors—the horseshoe crab. With ten eyes, five pairs of walking legs, a heart half the length of their bodies, and blood that can save a person's life, horseshoe crabs have been on this planet for 445 million years—since long before the...

Reader's Opinions

This was a splendidly interesting book about a subject I knew next to nothing going in. It was written in a very friendly style. Fredericks invited us into his world of exploring the horseshoe crab,...
